

WHAT IS CLAIMED IS:

1. Bathing brush comprising:

an annular main body made of elastic and water-absorbent material; and

several bathing balls fixed on the main body at intervals, each of the bathing balls including at least one elastic mesh tube and at least one binding member, the circumference of the elastic mesh tube being crimped and waved, then the elastic mesh tube being bound by the binding member, the bathing balls tightly abutting against the circumference of the main body.

2. Bathing brush as claimed in claim 1, wherein the main body is made of at least one elastic mesh tube.
3. Bathing brush as claimed in claim 1, wherein the main body is made of an elastic mesh tube, the circumference of the mesh tube being repeatedly folded to form a ring pattern.
4. Bathing brush as claimed in claim 1, wherein the main body is an annular sponge.
5. Bathing brush as claimed in claim 1, wherein predetermined sections of the binding member are respectively tied on the bathing ball and the main body.
6. Bathing brush as claimed in claim 5, wherein the binding member is strip-like, a middle section of the binding member being tied on the bathing ball, free ends of the binding member extending

outward and being tied on the main body.

7. Bathing brush as claimed in claim 1, wherein the binding member is tied around the bathing ball to divide the bathing ball into two expanded semispherical bodies.
8. Bathing brush as claimed in claim 1, wherein the main body is positioned on inner sides of the annularly arranged bathing balls.
9. Bathing brush as claimed in claim 1, wherein the main body is positioned on upper sides of the annularly arranged bathing balls.
